This HTML document creates a profile webpage using Bootstrap for layout and styling, and Google Fonts for custom typography. It includes multiple sections such as a navigation menu, an introduction section with a profile image, a list of favorite sports, and a hobbies section. The page also features custom CSS for additional styling and incorporates social media icons and interactive elements. JavaScript is included for Bootstrap functionality and potential custom scripts.

This HTML file represents a profile page focused on the Erbil Citadel, a historic site in Iraq. The page includes a navigation menu, a logo, and sections showcasing images and information about the citadel. It utilizes Bootstrap for styling and includes custom CSS files for additional styling. The page is responsive, ensuring a good user experience across different devices. JavaScript functionality is also included through an external script. Overall, it provides a visually appealing and informative presentation of the Erbil Citadel.
